Libraries are places of information. When most people think "library" they think books. And while that is certainly true, these days books take different shapes, such as e-books and audio books. More than just books, libraries are places of information, offering people free access to a wealth of information that they often can't find elsewhere, whether online, in print or in person.

DID YOU KNOW? Valentine's Day Fun Facts

A collection of 16 Valentine's
Day-themed facts for display
in your classroom.
Start discussions, research,
and inquiry with this exciting
collection!

It's February! And that means.....Valentine's Day!

Valentine's Day is right around the corner, and
love is in the air — even at the library! These
irresistibly sweet displays are sure to warm your
heart and prove that when it comes to romance,
the best place to start is at a library.

Last year we did a “Share Your Library Love”
board. That was fun, and great 😊 (I kept all the
hearts, seeing them helps remind me of what
things the students find important). But we
wanted to do something different this year.

Why do we celebrate Valentine's Day?

Chaucer lived in the Middle Ages, the era of
courtly love, when broad, romantic statements of
devotion—poems, songs, paintings—celebrated
partnership. By the end of the 15th century, the word
“valentine” was being used to describe a lover in poems
and songs of the day, and in the 18th century, a book
called The Young Man's Valentine Writer was published
in England. By the mid-19th century, mass-produced
paper Valentine's Cards were being created (though
Valentine card ideas are still worth trying), and
Valentine's Day as we know it was born.

How did Valentine's Day start?

Valentine's Day is a fixed day on the calendar, and the
ancient Roman calendar included a mid-February
holiday even before St. Valentine's time. That holiday
(arguably the origin of Valentine's Day), called
Lupercalia, celebrated fertility, and may have included a
ritual in which men and women were paired off by
choosing names from a jar. In Ancient Greece, people
observed a mid-winter celebration for the marriage of
the god Zeus and the goddess Hera. Some historians
wonder if these traditions may have influenced the way
we now celebrate February 14.

HERE'S
TO STRONG WOMEN.
MAY WE KNOW THEM.
MAY WE RAISE THEM.
MAY WE BE THEM.

HAPPY INTERNATIONAL WOMEN'S DAY

Happy Women's Month!

Salute to all women in the world
for their valuable contributions in
making the world a better place to
live in! ❤️❤️❤️

"It was good to walk into a library again; it smelled like home".

In early March 2020, COVID-19 blindsided university libraries. With little time to plan, we closed our library facilities at Nueva Ecija University of Science and Technology to protect the safety of our patrons and employees and moved to online services only and work from home. Thankfully, years of curating digital content, providing multiple opportunities for research interaction and developing vigorous search interfaces and web presences served us well during this transition.

With discussions now occurring about reopening campuses, university libraries face a paradigm shift. Instead of returning to normal, librarians will be returning to a “new normal” -- one where in-person classes and service interactions may be impossible or no longer preferred, where collections in physical format may be a barrier to access, and where collaborative study is shunned in favor of social distancing in buildings that can only safely house half the people they used to. How can we leverage this crisis to create new and innovative collections and services to improve our campus communities.

Information Literacy in the time of COVID-19

It is essential that all of us are information literate during a pandemic for our own health and safety.

Working with media literacy information literacy anyone can do these activities: research, evaluate, and communicate information in digital formats.

Information Literacy Essential Skills

- IDENTIFY** - Identify the type of information you need
- FIND** - Find the information you need
- EVALUATE** - Evaluate the information you find
- USE** - Use the information you find
- KNOWLEDGE** - Know the information you find

Information Literacy & Misinformation

Information literacy is essential for anyone who wants to stay informed and healthy during a pandemic. It is the ability to find, evaluate, and use information effectively.

COVID-19 Recommended Information Sources

- Department of Health - Philippines: www.doh.gov.ph
- World Health Organization: www.who.int
- US Centers for Disease Control and Prevention: www.cdc.gov

During times of crisis, people must be responsible to convey factual and reliable information to help others make informed decisions.

NEUST ADVISORY

from the **OFFICE OF THE UNIVERSITY PRESIDENT**

#WORKSUSPENSION
MARCH 17 TO APRIL 12, 2020

"Since Luzon is now under enhanced community quarantine and everyone is encouraged to do home quarantine, which means suspension of works. Please keep safe everyone. God bless us all"

- President Feliciano P. Jacobo

The EB of DOH is conducting comprehensive contact tracing activities for all cases. DOH is also in close coordination with concerned Local Government Units and Centers for Health Development for the implementation of infection prevention and control measures at the local level, and the Philippine National Police and other government agencies and concerned stakeholders for identification and management of close contacts.

"With the increasing number of cases, I implore everyone to fully cooperate with us in investigation and contact tracing activities. Individuals with a known history of exposure and travel presenting with mild symptoms are advised to self-isolate and undergo home quarantine for 14 days. Those presenting severe and critical symptoms need to be immediately admitted to health facilities. Please contact DOH and call the designated hotline at (02) 8-651-7800 loc 1149-1150 for appropriate management and referral," Health Secretary Francisco T. Duque said.

Libraries around the world are facing hard choices around which services to offer and how, ranging from minimal restrictions to full closure. We are aware that governments themselves are taking different approaches, sometimes ordering the closure of all institutions, others indicating that life should continue as usual, and others simply leaving decisions up to library directors.

Clearly any decision to restrict services or close a library is a difficult one and needs to be taken following an assessment of the relative risks.

Additional efforts to ensure hygiene, including through disinfecting hard surfaces is being taken by the library to keep its staff and the users safe.

The library has taken extra measures ensuring that all staff have the skills and tools to work remotely and that services, as far as possible, can still be provided digitally.

The library currently allows only visitors who have pre-booked thus setting a limit on the number of people using the library at any one time, and establishing how to enforce these (for example through advanced booking, ticketing, or using other means of counting numbers of users), as well as preventing situations where people may gather closely together, for example using one-way systems, limiting furniture, keeping reading rooms closed.

The details of the visitors are collected in advance that would help in future for contact tracing in case of visitor infection.

Promoting use of digital libraries and other tools – including potentially investing in more content/licenses increasing the number of eBooks users can borrow.

Raising awareness of digital offers, both on the front pages of their websites, and through putting up posters in the windows of library buildings.

Developing protocols for how to respond if someone with symptoms is identified in the library.

Ensuring that staff have the equipment and training necessary to stay safe, including consideration of screens if necessary, limiting contact as far as possible at workplace.

Did you know that November is Library and Information Services Month in the Philippines?

This is in accordance to Presidential Proclamation No. 837 s. 1991 which recognizes the "invaluable service that libraries and information centers render, i.e. providing data and materials for lifelong knowledge and learning, for research and for leisure." (Source: https://www.officialgazette.gov.ph/.../proclamation-no...)

For Year 2020, the theme for the 30th commemoration is "LibREAL", a portmanteau for the word Libraries and the acronym for Relate, Engage, Advocate, Lead. The letters "Lib" could also be interchanged with the latin word liber (meaning "free") and which is also the root of liberty ("the quality or state of being free"). With this play of words, this year's catchy theme aptly and vividly captures the essence of the libraries' role in attaining the sustainable development goals (SDG) established in the United Nation 2030 Agenda and integrated into our Philippine Development Plan (PDP) 2017-2022.
